Connected to **performance**

For more than 40 years, Prevost has been designing, manufacturing and marketing a comprehensive range of products for compressed air and fluid distribution networks, including safety quick couplings, filtration solutions and pneumatic equipment.

PREVOST has become the preferred partner for industries using pneumatic and hydraulic power. Each day, the Prevost team works to provide our customers with the latest, cutting edge technology.

Building on its success, Prevost is expanding across Europe, in the United States and in over 80 countries: our solutions and our staff's commitment are truly **CONNECTED TO PERFORMANCE**.

■ THE PREVOST CSR AND ITS 5 PILLARS :

- Efficient products focused on quality and safety
- Non-discrimination and equal treatment between men and women
- Respectful working conditions and local commitment
- Local purchasing and local services
- Limited environmental impact: priority on reducing packaging and waste sorting

Connected to **innovation**

Our approach to innovation is based on two aspects:

■ TECHNOLOGICAL DEVELOPMENT

Our R&D strategy has resulted in numerous patent applications.

We provide dependable tools and equipment with enhanced safety features to comply with all applicable industry standards.

■ MAKING THE BEST USE OF OUR PRODUCTS

We provide reliable equipment with a long service life to save our customers valuable time and money from lost production and replacement costs.

After investing in Prevost, your business will begin to see an increase in production rates.

We play close attention to design and ergonomics, which makes our tools easy and comfortable to handle for extended use.

Connected to your **business needs**

One of the best assurances of quality, for us, is our thorough knowledge of your applications.

Prevost supplies companies in the industrial and service sectors where **pneumatic and hydraulic powers are used**:

→ AUTOMOTIVE **MANUFACTURING**

Automotive construction, assembly lines, etc.

→ AUTOMOTIVE **MAINTENANCE**

Mechanical repairs, paintwork, bodywork, etc.

→ PLASTICS **PROCESSING**

→ WOOD

Sawmills, joinery workshops, etc.

→ TEXTILE **INDUSTRY**

Textile mills, garment manufacturing plants, etc.

→ FOOD-PROCESSING **INDUSTRY**

Abattoir, meat processing plants, dairies, etc.

Our products comply with a wide range of quality standards, sanitation requirements, sustainability measures and performance criteria. The designs and construction processes are intended to meet these rigorous specifications.

**BECAUSE WE UNDERSTAND
YOUR INDUSTRY, WE ARE
CONNECTED TO YOUR NEEDS.**

Connected to our **services**

To better serve you Prevost provides excellent technical, logistical and customer support services.

→ FIRST-CLASS **LOGISTICS**

Our team manages logistics so your products are packed with care and shipped on the same day your order is placed. Delivery may be arranged to best suit your schedule.

→ A DESIGN **OFFICE**

Our experts are dedicated to designing you a custom pipe network. They analyse, advise and assist you with a basic network diagram, a detailed plan and a full quote.

→ A STATE OF THE ART **TRAINING CENTER**

Our instructors provide classes for product training or sustainability seminars for customers looking to integrate energy efficiency into their sales and marketing strategies. Training courses can be conducted at our fully functional, high tech training center or at your work site.

→ AN INFORMATIVE CUSTOMER **SERVICE TEAM**

Our dedicated and knowledgeable support staff are on hand to assist you with placing orders, tracking shipments and technical questions.

→ A DYNAMIC AND RESPONSIVE **SALES FORCE**

→ OUR MARKETING DEPARTMENT **HELPS YOU DEVELOP YOUR BUSINESS**

Quick-release couplings, innovation for safety

Compliant with international safety standards and equipped with anti-hose whip technology, prevoS1 couplings are designed to eliminate accidents in the workplace and reduce costly damages to surrounding equipment.

An international range available in : ISO 6150 B, ISO 6150 C, European, British, Aro 210, Asian, Trufflate

SAFETY AT EVERY LEVEL

Safety in construction

- **Anti-static construction**
No static electricity conducted
- ⊕ Dust will not be attracted to painted or varnished surfaces.
- **Silicone-free manufacturing**
⊕ Surface imperfections will not be created during the paint or varnish application by contaminated compressed air.

Enhanced user safety features

- **Secure automatic decompression and disconnection**
No risk of hose whip or accidental disconnection
- ⊕ Eliminates personal injury and damage to surrounding products or equipment
- **Colour coded button**
Quickly identify different profiles
Reduce connection errors
- ⊕ Less damage, fewer accidents and leaks

INNOVATING FOR ENERGY EFFICIENCY

Advantages of prevoS1 couplings

- **Automatic and effortless coupling**
Lightweight, resistant to abrasion, vibrations and corrosion
- ⊕ Long service life
- **Innovative sealing mechanism**
prevoS1 quick safety couplings used with **Prevost** plugs eliminates all risk of leaks in the coupled and uncoupled positions.
- **A guaranteed seal:**
- ⊕ **O-ring**
Allows a perfect outer external seal between the plug and coupling when connected.
- ⊕ **Valve seal**
Fits tightly against the valve and provides a complete seal.

Financial benefits

- **prevoS1** quick safety couplings offer a three-year warranty, will operate leak free and require no ongoing maintenance - all factors which reduce operating expenses for businesses
- **No significant pressure loss** as air passes through the coupling. The aerodynamic valve provides a consistent flow rate, without any pressure loss. This results in a higher powered, more efficient tool.
- **Optimal air flow guaranteed** for improved efficiency of pneumatic systems and tools
- ⊕ Lower energy costs
- ⊕ Enhanced productivity

INNOVATING FOR USER PERFORMANCE

Simple and intuitive to use

- **Quick, effortless coupling**
Fast connection
- ⊕ Internal mechanism cannot be damaged
- **Compact and lightweight**
Precise control
Reduce fatigue during repetitive use
- ⊕ Increase production speed
- **Swivel body**
Free range of movement
Ideal positioning
- ⊕ Less labor output from operator

Comfortable for all day use

- **Ergonomic shape**
⊕ Comfortably fits in the palm of your hand
- **Composite body**
Non-scratch
Protection against cold air
- ⊕ Allows a firm grip on the coupling
- **One step to connect and disconnect pneumatic systems and tools**
Quickly change out tools on assembly lines
- ⊕ Streamline movement and increase productivity

PREVOST PIPING SYSTEM

The 100% aluminium concept

The **PREVOST PIPING SYSTEM'S** pipes and fittings are 100% aluminium, compact, lightweight and professional strength.

They can be installed easily and quickly for immediate pressurisation.

The PREVOST PIPING SYSTEM range guarantees :

- a clean, high quality air at all times
- a sealed system
- an optimised flow rate
- an operating pressure range: **from - 0.98 bar to + 16 bar**
- a temperature range: **from - 20°C to + 80°C**

Workstations are well supplied, accessible and ergonomically designed.
The facility is durable and can be easily upgraded.

+ COMPACT AND LIGHTWEIGHT

The 100% aluminium composition of the **PPS** range creates a system that is compact, lightweight and durable.

+ HIGH TECH, MODERN MATERIAL

Aluminium alloy, combined with external electrostatic paint and internal treatments all **protect the pipe against the oxidation and corrosion.**

+ 100% CUSTOMIZABLE

The wide range of sizes and fittings allow the system for modular and scalable construction.

+ EASY AND QUICK TO ASSEMBLE

Simply insert the pipe into the **PPS** fitting then **tighten the nut.**

+ LEAK FREE WITH MINIMAL PRESSURE LOSS

The «**PPS Grip Concept**», creates a secure, **leak free connection.** The smooth internal surface generates a laminar flow, a low friction coefficient and a maximum flow diameter which are all factors **to reduce pressure loss.**

+ COMPATIBLE WITH COMPRESSOR OILS

Aluminium and viton seals are compatible with compressor lubricants.

+ TOUGH MATERIAL

Aluminium guarantees long term performance:

- **mechanical strength**
- **pressure resistance**
- **shocks absorbent**

MAL RP150	194,62	1

Composition: Assortment of 150 CONEX push-in fittings :

50 straight male conical fittings: (for pipe Ø ext. in mm)

- 10 x RPD MR0600 (Ø 6mm)
- 10 x RPD MR0601 (Ø 6mm)
- 10 x RPD MR0800 (Ø 8mm)
- 10 x RPD MR0801 (Ø 8mm)
- 10 x RPD MR0802 (Ø 8mm)

40 swivelling 90° male conical elbows :

- (for tube O.D. in mm)
- 10 x RPC MR0600 (Ø 6mm)
- 10 x RPC MR0601 (Ø 6mm)
- 10 x RPC MR0800 (Ø 8mm)
- 10 x RPC MR0801 (Ø 8mm)

10 cylindrical male elbows :

- (for tube O.D. in mm)
- 10 x RPC MG0601 (Ø 6mm)

30 equal unions :

- (for external Ø pipe in mm)
- 10 x RPU ET0606 (Ø 6mm)
- 10 x RPU ET0808 (Ø 8mm)
- 10 x RPU ET1010 (Ø 10mm)

20 equal tees: (for tube O.D. in mm)

- 10 x RPT ET0606 (Ø 6mm)
- 10 x RPT ET0808 (Ø 8mm)

1 tube cutter: R22 CT

Automatic hose reels are an essential tool to enhance work.

Automatic hose reels are an essential tool to enhance work place organization. They save time and allow hoses to be used with safety and ease. Available for the following fluids:

- compressed air,
- cold water and hot water at high and low pressure,
- oil, grease,
- oxygen and acetylene

The Prevost reel range covers all needs.

NEW
3 possible orientations of the supply pipe

RETURN SPRING

The return spring system effortlessly winds the hose back into the reel housing to significantly increase the service life of the hose.

The hose is no longer laying on the ground being exposed to contaminants, damage or creating a tripping hazard.

CONTROLLED HOSE RETURN SYSTEM

(identified by a pipe and an adjustable end-stop of yellow color)

The DRFB range features a braked return system to create a safer environment for users and surrounding equipment.

When the hose is released, the brake enables the hose to reel back into the housing gradually and at a controlled speed.

NEW
Fluorescent yellow PU hose for more visibility on workstations

QUICK COUPLINGS

Air hose reels are paired with a **prevoS1** quick safety coupling which offers hose whip protection and enables depressurisation and disconnection in one simple push of a button.

The range features various types of couplings:

- 6 mm, 7.4 mm, 8 mm and 11 mm clearance depending on the hose size and the corresponding air flow.
- various profiles (ISO 6150 B, ISO 6150 C, European 7.4 mm, etc.) meeting the needs of international markets.

BEND RESTRICTOR

With the bend restrictors in place, the hose will not kink at the inlet and outlet connectors. The system is made from a lightweight polyamide and prevents impact damage from hoses. The stainless steel reel range features a stainless steel bend restrictor.

STOP CATCH

The reel mechanism includes a catch system that locks the hose at the desired length for the operator. This system avoids the user being weighed down by a heavy, awkward length of hose. Pulling on the hose releases the catch which allows the return spring to automatically wind the hose back into the housing.

WALL-MOUNTED OR OVERHEAD INSTALLATION

Prevost hose reels can be mounted on a wall, overhead or installed on a trolley to allow easy access anywhere in the workshop. A conveniently placed reel reduces works space clutter and increases productivity and efficiency.

Innovative technical tools to enhance performance

The design and manufacture of **Prevost** tools guarantee:

- high-quality work, excellent efficiency and a wide range of applications
- easy operation, adjustment and maintenance
- an excellent level of safety to eliminate or reduce risks generated by machines (positive action required to switch on using a manual control

designed for this purpose, protective mechanisms, positioning of handles and levers, etc.)

- reduced noise and vibration levels
- ergonomics designed to reduce discomfort, fatigue and physical constraints for operators (taking morphology into account, appropriate grips and handles, coated handles, machine stability, etc.)

Compact, compressed air blow guns with embedded plug

Users will appreciate the easy handling and comfortable grip of the **prevoS1** blow gun in their daily routine.

These blow guns are equipped with a precision crafted, nitrided steel plug and compatible with all major connection profile standards. When the blow gun is connected directly into a **prevoS1** quick-safety coupling, they form a seamless, leak-free connection. Exclusive patented technology.

Safety

- Additional safety with the **prevoS1** quick coupling

Performance

- Powerful blowing
- Flexible handle for progressive blowing

Long service life

- **Sturdy construction:** provides an extended service life
- **Waterproof body:** water or any external elements cannot infiltrate internal components

Energy savings

- Low air consumption
- Embedded, precision crafted plug prevents leaks

Easy to use

- User friendly design
- Small footprint: easy to handle and store
- High-tech composite body material: sturdy, lightweight and insulated to regulate temperature
- Easily hangs to clear workspaces

Filtration, regulation and lubrication of compressed air

Optimise the efficiency of actuators and pneumatic tools

The extensive **Prevost Filtration** range provides professional level equipment for treating compressed air and pneumatic systems.

Our solutions guarantee clean air throughout the network which will optimise air flow and extend the service life of your entire system.

An efficient air system is the basis of quality production.

Applications

- The **Prevost Filtration** range can be used for numerous industrial applications.
- ⊕ Air tool supply
- ⊕ Pneumatic automation
- ⊕ Pneumatic tools
- ⊕ Blowing
- ⊕ Inflation

Technical specifications

- ⊕ Operating pressure range: 0,8 - 12 bar
- ⊕ Temperature range: +5°C to 50°C
- ⊕ G1/8 - G1/4 - G3/8 - G1/2

Material composition

- ⊕ Body: Aluminium
- ⊕ Tank: Polycarbonate
- ⊕ Protections: Polyamide

Advantages of Prevost Filtration

- **Clog indicator**
- ⊕ Indicator alerts when the cartridge is full or needs to be replaced.
- Pressure loss will occur when the filter cartridge is saturated.

- **Manual Drain**
- ⊕ The drain is equipped with a barb-style outlet where a hose can be installed to transport condensates to a treatment unit.

- **Tank with "bayonet"-type locking**
- ⊕ Quickly replace a filter cartridge or lubricator tank with this style of locking system.

- **Lockable regulator**
- ⊕ Secure regulator settings
- ⊕ Protect pneumatic actuators

- **Integrated pressure gauge**
- ⊕ Compact assembly
- ⊕ No external components to be mounted
- ⊕ Ideal for equipping a pneumatic cabinet

GENERAL TERMS OF SALE

1. APPLICATION

These general terms and conditions of sale are brought to the customer's attention with the sales proposal or, in case of a direct order, via the order confirmation. All sales are concluded subject to the condition precedent of the application of the full version of these general terms and conditions of sale. It is inferred that the customer unconditionally accepts these terms and conditions.

The present GTS were established under the current regulation. In case of modification Prevost would have to adapt the terms to comply with the regulation then in force. These general terms and conditions of sale shall prevail over those of the customer, notwithstanding any conflicting clauses provided for in its general terms and subject to any amendments which may be made to these terms and conditions under the provisions of this clause.

Any contractual provisions contrary to these terms and conditions must be proposed to PREVOST in writing, separately from the pre-printed terms on the customer's contractual documents, and prior to PREVOST's acceptance of the order. In order to be binding on PREVOST, the proposed modification must be expressly approved, prior to order acceptance, in writing and signed by PREVOST.

In case of financial risk, PREVOST may in particular demand guarantees and/or special payment terms.

2. OFFER - ORDER CONFIRMATION

Offer sent to the customer has a period of validity of 3 months, unless expressly otherwise specified.

Orders sent by the customer constitute order proposals subject to acceptance by PREVOST. They must be complete and all their elements precisely defined. Orders drawn up by agents and/or representatives of PREVOST are binding only if confirmed by PREVOST. An order shall be considered accepted by PREVOST only when the customer has received an order confirmation.

3. CANCELLATION OR MODIFICATION OF ORDERS

All orders placed with PREVOST are firm and definitive. Exceptionally, they may be cancelled or modified at the customer's writing request on condition of PREVOST's express agreement, depending on the work already undertaken. Any modification may increase the cost of the order, which shall be notified to the customer for acceptance, and/or cause delivery delays for the relevant order.

4. PRICES – EQUIPMENT SOLD

The prices, information and characteristics presented in the catalogues, specification sheets or other documents are for information purposes only and under no circumstances shall they be considered as firm offers. These documents are not legally binding. Prices are quoted exclusive of all taxes for products shipped ex-works, unpacked, un-assembled and non-operational. The customer shall bear all taxes, fees, costs, tax stamps and insurance premiums. For deliveries abroad, all taxes, duties, fees, and inspection costs shall be borne by the customer, as well as any costs incurred pursuant to foreign legislation. Furthermore, at any time and without notice, PREVOST reserves the right to carry out such modifications or improvements as it deems necessary on any product and the customer shall not be entitled to bring a claim for any damage arising therefrom.

5. PAYMENT

Standard payment terms are Net thirty (30) days from the day of invoice unless other terms are previously agreed upon in writing by PREVOST. Unless otherwise provided in any special terms, customers shall make all payments net, cash, without discount and at PREVOST's office.

Any bills of exchange enclosed with invoices for acceptance must be returned to PREVOST accepted within seven (7) days. Interest for late payment, equal to three (3) times the legal interest rate in France can rightfully be applied in case of non-payment by the due date.

In case of the execution of an order, PREVOST reserves the right to require guarantees for payment and the proper performance of financial undertakings, should the customer's financial situation deteriorate, shown either by non-payment of the due amount at the agreed date or by an examination of the customer's financial and accounting documents or by any other means demonstrating this deterioration in a tangible way.

In such circumstances, PREVOST reserves the right to solicit such guarantees as are required to safeguard its rights or to suspend the performance of pending orders without prejudice to any cancellation of the order at its discretion. If the customer has not paid the whole or the part of the contract price which have become due, PREVOST shall be authorized to put a stop to any remaining shipments and, after the giving of formal notice, to cancel the order by virtue of the customer's fault and to its detriment. Any debt collection costs that PREVOST may be required to incur and fees of representatives of the law shall be borne by the defaulting customer. Any company whose payment is past due shall be liable to the creditor, as of right, for a flat-rate allowance for collection costs, the amount of which is set at 50 pounds. If the collection costs incurred exceed the amount of the flat-rate allowance, PREVOST shall be entitled to claim additional compensation.

In the event that the customer sells, transfers or pledges its business or equipment or contributes its business or equipment to a company or one of the payments or the acceptance of a bill of exchange is not made on the agreed date, all amounts due will become payable whatever their due dates.

6. DELIVERY - TRANSPORT

DELIVERY

Unless otherwise clearly provided, delivery shall be deemed to have been made as soon as the products are made available at the PREVOST plants, prior to loading. Such products shall be deemed to have been removed and delivered at this time. In case of sales abroad, the various authorizations (import license, foreign exchange transfer authorization, etc.) must have been obtained by the customer beforehand. Any modification of an order in the process of being performed, if accepted by PREVOST, leads to an extension of the agreed delivery period in the way indicated by PREVOST to the customer.

If the customer does not remove the products from PREVOST's premises, or refuses to accept such products, and upon the expiry of the delivery period, the risk shall pass to the customer with effect from the day on which the products are made available on PREVOST's premises and PREVOST shall have the right to store the products at the customer's expense and to request the reimbursement of freight and handling costs. If the delay in removing the products from PREVOST's premises exceeds two (2) weeks from the date on which the products were made available, or if the customer refuses to accept delivery, PREVOST shall have the right to terminate the contract, resell the products and claim the difference between the initially agreed price and the resale price.

TRANSPORT

The customer shall be responsible for signaling any reservations to the carrier regarding missing products and/or damaged parcels upon receipt of the products. Such reservations must be written on the carrier's document and the delivery slips and reported to the carrier within a maximum of three (3) days, calculated in accordance with the provisions of article L.133-3 of the French Commercial Code, by registered letter with return receipt and with a copy sent to PREVOST within the same period. Under no circumstances shall PREVOST be liable for any destruction, damage, loss or theft occurring during the transport of the products.

7. PASSING OF TITLE AND RISKS

TITLE TO THE PRODUCTS DELIVERED SHALL NOT PASS TO THE CUSTOMER UNTIL THE EFFECTIVE PAYMENT IN FULL OF THE PRINCIPAL AMOUNT, INTEREST AND ANCILLARY COSTS WITHIN THE DEFINED TIME FRAME. In case of payment by check or bill of exchange, payment shall be deemed to have been made upon bank acknowledgement of received payment. Notwithstanding the title retention clause relating to the sold products, the risks pertaining thereto (including the risks of loss or destruction) shall pass to the customer upon delivery of the products as defined in clause 6. Accordingly, the customer agrees to insure the products sold subject to title retention, at his expense and in the name of PREVOST, against all risks that they may sustain or cause until the products have been paid for in full. The customer also agrees to inform PREVOST of any material or judicial occurrence that may affect the products subject to the title retention clause. Despite PREVOST's retention of title, the customer is authorized, unless otherwise specified, to transform, incorporate or resell the products before payment in full thereof provided that such customer informs any subpurchaser of the products of the title retention clause relating to the relevant products and PREVOST's right to reclaim the products or the cost of the products from the subpurchaser (at the price owed by the customer to PREVOST) regardless of the person holding the products. Should PREVOST suffer a loss of rights as a result of third-party's access, the customer shall be obliged to indemnify PREVOST against the damage including all costs incurred by PREVOST for legal prosecution.

In case of default in payment by the due date, PREVOST has the right to demand the immediate return of the products at the customer's expense, automatically entailing the cancellation of the sale. In such circumstances, the customer shall have to compensate the loss sustained by PREVOST due to any depreciation of the value of the products and in any case, from the fact that the products were unavailable as well as any other damage that PREVOST may show. The customer shall also cover expenses related to the recovery of the cost of products and any other damage that PREVOST may show. The customer shall pay PREVOST a fine in the amount of two percent (2%) of the price of unpaid products per day of delayed return as of receipt of the registered letter with return receipt in which such return is requested. Any down payments or deposits made by the customer shall be set off against any amounts payable by the customer under the terms of this clause.

8. WARRANTY

The PREVOST warranty only applies to products delivered by PREVOST and exists only towards the customer of PREVOST. It does not apply to any third party purchaser. The warranty covers any manufacturing defects or defects in materials from the delivery date as specified in article 6 and where such products are used under normal operating and maintenance conditions for a period of: - one (1) year by default.

To invoke the provisions of the warranty, the customer must notify PREVOST in writing and within the above stipulated period, of the defects allegedly found in the products and provide proof thereof. The customer must facilitate the assessment of these defects and their repair by PREVOST.

The customer must not, save in the event of PREVOST's prior express consent, carry out the repairs himself or have them done by a third party. Any unauthorized intervention may entail the immediate cancellation of the warranty.

Under the terms of the warranty PREVOST may choose whether to repair or replace, ex-works, all the parts covered by the warranty and found to be defective by PREVOST.

Any works required under the warranty obligations shall in principle be carried out at PREVOST's premises, after the customer has returned to PREVOST, at the customer's expense, the defective supplies or parts. Repairs or replacements made under the terms of the warranty shall not extend the warranty period. Parts replaced during the warranty period shall be returned to PREVOST and shall become owned by PREVOST.

PREVOST excludes all liability for and the warranty shall not cover any defects (and any damage of any kind whatsoever arising therefrom) resulting from: - any assembly or installation of the products that does not comply with PREVOST's instructions or specifications (documentation, operating and assembly instructions, special recommendations, etc.) or professional standards, or defects and the consequences thereof in case the start-up was carried out by the customer whereas PREVOST had stated that it was to carry out the start-up itself,

- abnormal use of the products (e.g. overloading the equipment etc.), defective maintenance, lack of supervision, negligence (e.g. continuing to use a component or a part of a piece of equipment proving to be defective that could lead to more substantial damage to the piece of equipment or surrounding equipment delivered by PREVOST), unsuitable storage conditions, - any use other than the use for which the products were intended, or any abnormal use or use that does not comply with PREVOST's instructions, - materials supplied or a design imposed by the customer, or from servicing or maintenance performed on the products by third parties not expressly authorized by PREVOST, - defects and the consequences thereof resulting from normal wear and tear of the product, - a non-PREVOST product being used with, assembled with or integrated into a PREVOST product. PREVOST shall not be held liable for any damage whatsoever resulting from such combination.

PREVOST shall not be liable for any warranty that is not listed in clause 8. Unless otherwise specifically provided in writing, no warranties relating to results or performance of products are granted to customers apart from the warranty regarding the technical characteristics of the product as described in PREVOST commercial documentation.

9. LIMITATION OF LIABILITY

Save as otherwise agreed, there shall be no liability on PREVOST towards the customer for loss of production, loss of profit, loss of use, loss of contracts or for any other consequential or indirect loss whatsoever. It is expressly agreed between the customer and PREVOST that any claim of compensation for any loss arising out of damage to the customer's professional goods and services and based on liability for defective products is excluded. To the extent permitted by applicable law, the contractual liability in respect of any other damage within the order, shall not exceed the price of the product at issue.

10. CLAIMS AND RETURNS

To be valid, any claim relating to a conspicuous defect must be made within eight (8) days after the products have been made available by PREVOST. Returns will be authorized only if accepted beforehand by PREVOST and only if the items are to be found in the latest catalogue. PREVOST shall not accept any return for parts with a validity date.

Returns may be repaired or exchanged at PREVOST's discretion. They must be shipped to PREVOST's premises in the UK with carriage and all other costs paid, as new, and without having been subject to any modifications. It is expressly stipulated that in case of taking back of products, a charge of 15% of the amount of the products will be deducted for administrative, control and handling costs. Parts manufactured according to instructions or designs supplied by the customer shall not be taken back or exchanged.

11. INTELLECTUAL PROPERTY

PREVOST retains all rights to the intellectual property rights and know-how related to the products sold, whether or not such items were developed in connection with such request. PREVOST grants the customer the right to use any software which may be provided with the products sold as stated in the user license provided with such software. The customer undertakes to comply with the terms and conditions of such license, failing which such customer shall be held liable. The customer also undertakes not to infringe any of PREVOST's intellectual property rights and represents that he has full knowledge of such rights.

The customer undertakes neither to remove the trademark from products nor to reproduce or procure the reproduction of the trademarks, design rights, patents and any other industrial or intellectual property rights held by PREVOST, in whole or in part, and nor to provide third parties with any information of any kind whatsoever enabling the partial or complete reproduction of such rights, failing which legal action will be taken.

12. STUDIES, DRAWINGS AND FILES

PREVOST has and shall retain full ownership of any studies, documents or technical information provided to the customer concerning the products supplied thereto (plans, drawings, propositions etc.). These documents can neither be reproduced nor communicated to third parties, particularly competitors. They must be returned to PREVOST upon request. The provided files, studies and drawings are not binding and PREVOST reserves the right to modify the products in any manner it deems necessary during the final execution of the order. In all cases, the customer is responsible for verifying the studies, projects and calculations provided to the customer by PREVOST and for checking that they comply with the conditions of use expected by the customer.

13. EXPORT CONTROL

Certain products and related technology and documentation sold by PREVOST may be subject to national, foreign, or international trade and export control laws and regulations («Export Laws»). Diversion contrary to such Export Laws is prohibited and the customer will comply with them regarding export, re-export, re-sale or use of the products. The customer will not export or re-export, directly or indirectly, the products and related technology and documentation to any country, entity or person under sanction or embargoes. The customer will not use the products in relation to nuclear, biological or chemical weapons or missile systems capable of delivering the same or in the development of any weapon of mass destruction.
